

# Spectral Geometry of Partial Differential Operators

M. Ruzhansky, M. Sadybekov, D. Suragan

Pages

	Contents	1
<b>chapter 1</b>	<b>Functional spaces</b>	4
section 1.1	Introduction	4
section 1.2	Normed Spaces	5
section 1.3	Hilbert Spaces	8
section 1.4	Examples of basic functional spaces	9
section 1.5	The concept of Lebesgue integral	10
section 1.6	Lebesgue spaces	11
section 1.7	Sobolev spaces	12
section 1.8	Subspaces	13
section 1.9	Initial notion of embedding of spaces	17
section 1.10	Separable spaces	18
<b>chapter 2</b>	<b>Foundations of linear operator theory</b>	20
section 2.1	Introduction	20
section 2.2	Definition of operator	21
section 2.3	Linear operators	22
section 2.4	Linear bounded operators	24
section 2.5	The space of bounded linear operators	36
section 2.6	Continuation of a linear operator by continuity	37
section 2.7	Linear functionals	40
section 2.8	Inverse operators	44
section 2.9	Examples of invertible operators	49
section 2.10	The contracting mappings principle	55
section 2.11	Normally resolvable operators	57
section 2.12	Restrictions and extensions of linear operators	63
section 2.13	Closed operators	66
section 2.14	Closure of differential operators in $L_2(a,b)$	75
section 2.15	General concept of strong solutions of the problem	78
section 2.16	Compact operators	82
section 2.17	Volterra operators	89
section 2.18	The structure of dual space	95
section 2.19	Conjugate to a bounded operator	96
section 2.20	General concept of adjoint operator	105
section 2.21	Two examples of nonclassical problems	125
<b>chapter 3</b>	<b>Elements of the spectral theory of differential operators</b>	138
section 3.1	Introduction	138
section 3.2	The resolvent and spectrum of an operator	139
section 3.3	Nonemptiness of the spectrum of a bounded operator	143
section 3.4	Fredholm operators	145
section 3.5	Eigenvectors and associated vectors	148
section 3.6	Basis in Hilbert space	152
section 3.7	Schatten classes, Hilbert-Schmidt operators, nuclear operators	156
section 3.8	The spectral theory of Sturm-Liouville operator	158
section 3.9	Non-selfadjoint ordinary differential operators	168
section 3.10	Correct boundary value problems for Laplace operator	174
section 3.11	Laplace-Dirichlet operator on a straightedge	179
section 3.12	Laplace-Dirichlet operator in a ball	181

section 3.13	Laplace-Neumann operator in a ball	184
	Dirichlet problem for a general linear elliptic equation of the second order	188
section 3.14		
section 3.15	Boundary conditions of a volume elliptic potential	192
section 3.16	Cauchy-Dirichlet heat operator	196
section 3.17	Cauchy-Robin heat operator	200
<b>Chapter 4</b>	<b>Symmetric decreasing rearrangement</b>	<b>204</b>
Section 4.1	Introduction	204
Section 4.2	Symmetric decreasing rearrangement (sdr)	206
Section 4.3	Main properties of sdr	212
Section 4.4	Hardy-Littlewood inequality	215
Section 4.5	Riesz' inequality	216
Section 4.6	Polya-Szego inequality	218
Section 4.7	Talenti's inequality	220
Section 4.8	Burchard-Guo theorem	223
Section 4.9	Brownian motion in a ball	231
Section 4.10	Optimal membrane shape for the deepest bass note	233
Section 4.11	Pull-in voltage in MEMS	235
Section 4.12	Maximizer body of the gravitational field energy	243
Section 4.13	Dynamical stability problem of gaseous stars	245
Section 4.14	Stability of symmetric steady states in galactic dynamics	247
<b>Chapter 5</b>	<b>Inequalities of spectral geometry</b>	<b>250</b>
Section 5.1	Introduction	250
Section 5.2	Isoperimetric inequalities for the logarithmic potential operator	252
Section 5.3	Isoperimetric inequalities for the Riesz potentials	263
Section 5.4	Riesz transformations in spherical and hyperbolic geometry	277
Section 5.5	Spectral and boundary properties of the Bessel potentials	285
Section 5.6	Geometric maximizers for convolution type operators	295
Section 5.7	Isoperimetric inequalities for the nonlocal Laplace problem	305
Section 5.8	Spectral geometric inequalities for heat potential operators	311
Section 5.9	Isoperimetric inequalities for the Cauchy-Dirichlet heat operator	320
Section 5.10	Isoperimetric inequalities for the Cauchy-Robin heat operator	328
Section 5.11	s-number inequalities for the heat operator in triangular cylinders	333
Section 5.12	Polya-type inequalities for the heat operator in polygonal cylinders	339
Section 5.13	s-numerical inequalities for the wave operator	345
